At the conclusion of this course, the BLS student will be able to assist in placing ECG electrodes on a real patient by preparing the skin, selecting the appropriate lead, and placement in the correct anatomical landmarks. ALS and BLS will share the primary lecture covering cardiac A & P, basic ECG recognition, acquisition & interpretation of a 12 lead, & reporting findings to the appropriate medical command facility.

This class will demonstrate the importance of prehospital 12 lead ECG acquisition & EMS field activation in STEMI systems of care. It is approved for 4 ALS & 2 BLS med/trauma continuing education hours.

April 23 0800-1200 & 1200-1600 & April 24 0800-1200 & 1200-1600
